

CAT® UNDERCARRIAGE & TRACKS

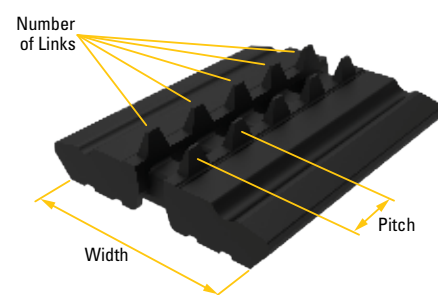

CAT® TRACKS THAT FIT MORE THAN JUST CAT® MACHINES

TRACK REPLACEMENT MADE EASY WITH CATERPILLAR OPTIONS

Cat® rubber tracks are compatible with a wide variety of competitive equipment brands and models. To simplify the process of finding suitable Cat rubber track alternatives for non-Cat machinery, the following cross-reference table is designed to assist dealers, service technicians, and equipment owners.

Each entry includes the corresponding machine make and model, along with the recommended Cat rubber tracks part number. This ensures optimal fit, performance, and durability across a wide range of applications.

Track dimensions are listed on page two in the format Width × Pitch × Links. Pitch is critical for proper engagement with the sprocket – an incorrect pitch can cause misalignment and machine malfunction. The number of links determines the overall track length, which must match the undercarriage wrap to ensure proper tension. The track adjuster compensates for wear and maintains the correct sag. Track width is the only adjustable dimension; Cat offers multiple widths per machine size to suit various applications. However, these widths may not fit competitive machines, so always confirm compatibility before purchase. For details regarding warranty coverage for Cat tracks, please contact your local Cat dealer.

RATING KEY		HEAVY DUTY BLOCK	HEAVY DUTY BAR	GENERAL DUTY ZIG ZAG
● — Best ○ — Good ▲ — Not Recommended				
Gravel		●	○	▲
Hard Surface		●	●	○
Dirt		●	●	○
Turf		●	○	▲
Snow		○	●	●
Side Slope		○	○	●
Unfinished Terrain		●	○	▲

*Costs based on regular maintenance schedule outlined in Operation and Maintenance Manual and 500 hours a year / 1500-hour average track life.
